

CSM-ARAS

Stakeholder Coverage & Communication Ownership Plan

CyberDSA Product Launch & Market Activation

Purpose

Establish resilient, multi-layer Aras coverage of priority CyberSecurity Malaysia stakeholders so that strategic, operational, technical, commercial and CyberDSA product-launch activities do not depend on a single relationship owner.

Prepared for: CyberDSA Product Launch Readiness & CSM Communication Alignment

Date: 13 August 2026

Status: Working Plan — Stakeholder ownership and event-day responsibilities to be confirmed with designated owners.

1. Executive Summary

Core recommendation. For CyberDSA, Aras should replace a one-to-one relationship model with a multi-layer stakeholder coverage model. Each priority CSM stakeholder should have a primary Aras owner, secondary operational cover, specialist support, and an executive escalation path where required.

Coverage Layer	Purpose
Primary relationship owner	Accountable for continuity, relationship context and closure of agreed actions
Secondary / operational cover	Ensures actions continue when the primary owner is unavailable and supports coordination cadence.
Technical / commercial specialist	Joins when the conversation requires product, architecture, AI platform, commercial, marketing or account expertise.
Executive escalation	Provides organisational authority, resource commitment and issue resolution where needed.

Target state: Priority CSM stakeholders should have approximately three active Aras relationship paths — relationship/programme, specialist, and executive/commercial cover — rather than one dependency path.

2. Objectives

- Increase continuity and resilience of the CSM relationship during the CyberDSA product-launch period.
- Ensure CSM stakeholders can reach the correct Aras person quickly for strategic, technical, commercial, marketing and operational matters.
- Prevent DAF and Hadri from becoming single points of failure for every CSM interaction.
- Increase direct visibility of Fuad, Farul, Azza, Kenny, Shuhada and commercial/event stakeholders where their expertise is relevant.
- Create clear ownership for pre-event preparation, launch-day engagement and post-event opportunity conversion.
- Enable Aras to demonstrate organisational depth and commitment to CSM through structured stakeholder coverage.

3. Priority CSM Stakeholder Coverage Matrix

The following matrix defines the recommended minimum Aras coverage for currently identified CSM stakeholders relevant to the CyberDSA product launch, technical collaboration and market activation workstream.

CSM Stakeholder	Primary Aras Cover	Additional Aras Coverage	Coverage Purpose
Mohammad Fahdzli bin Abdul Rauf	DAF	Kenny; Farul; Hadri	Strategic partnership; commercialisation; CyberDSA positioning; executive escalation
Azrul Nazim Abdul Aziz	DAF	Hadri; Kenny; Shuhada; Zulfelka	Programme mobilisation; account activation; commercial coordination; stakeholder follow-through

CSM Stakeholder	Primary Aras Cover	Additional Aras Coverage	Coverage Purpose
Mohammad Zaharudin Ahmad Darus	Hadri	Fuad; Farul; DAF	AI platform; token utilisation; intelligence platform; technical integration; strategic escalation
Mohamad Hafiz Rahman	Hadri	Fuad; Farul	GovSec/TI integration; telemetry; architecture; demo readiness
Mohamed Iqbal Tajol Azmi	Fuad	Hadri; Farul	Intelligence platform; AI technical development; GovSec technical alignment
Muhammad Amirul Bukhari Razak	Fuad	Hadri; Farul	Development; AI integration; product/technical validation
Nurshahira Mohd	Hadri	Fuad; Shuhada	Technical/project coordination; AI-instance activities; action tracking
Nazri Ahmad Zamani	Hadri	Fuad; Farul; DAF	R&D; UPM/Purple Teaming; AI infrastructure; innovation collaboration
Suraya Hani Ahmad Zaki	DAF / Hadri	Fuad; Shuhada	Programme alignment; technical collaboration; coordinated follow-through
Siti Aishah Omar	DAF	Azza; Shuhada; Hadri	Market activation; commercial engagement; customer/account mobilisation

4. Aras Stakeholder Coverage Roles

DAF — Strategic / Practice / Market

Primary scope: Overall relationship orchestration; senior CSM engagement; CyberDSA strategy; product positioning; strategic accounts; commercial opportunities; POC conversion.

Recommended CSM coverage: Fahdzli; Azrul; Siti Aishah; Suraya; strategic escalation for technical stakeholders.

Hadri — Programme / Solution / Integration

Primary scope: Operational integration point; technical coordination; CSM action tracking; meeting and readiness coordination; solution integration.

Recommended CSM coverage: Zaharudin; Hafiz; Nurshahira; Nazri; Suraya; Azrul where programme coordination is required.

Ahmad Fuad — Product Technical Authority

Primary scope: GovSec, VoronDRQ and ChainSentry technical authority; architecture; technical Q&A; integration; roadmap; demo and POC definition.

Recommended CSM coverage: Hafiz; Zaharudin; Iqbal; Amirul; Nazri.

Farul — CTO / AI Platform Coverage

Primary scope: Sovereign AI infrastructure; GPU/model/platform architecture; APIs; production infrastructure; strategic technical escalation.

Recommended CSM coverage: Zaharudin; Nazri; Hafiz; senior technical leadership.

Kenny — Operations / Commercial Executive

Primary scope: Organisational commitment; resource support; operating model; commercialisation; delivery readiness; executive escalation.

Recommended CSM coverage: Fahdzli; Azrul; senior CSM management/commercial stakeholders.

Azza — Marketing & Market Activation

Primary scope: CyberDSA campaign; messaging; co-branding where approved; invitations; awareness; lead capture; MQL generation; nurture.

Recommended CSM coverage: Siti Aishah; Azrul; CSM marketing/commercial/corporate communications counterparts.

Shuhada — Account & Stakeholder Operations

Primary scope: Contact validation; account mapping; invitation and meeting coordination; CRM records; MQL routing; action follow-up.

Recommended CSM coverage: Azrul; Siti Aishah; Nurshahira; programme/account coordinators.

Encik Zulfelka — Commercial Coverage

Primary scope: Commercial opportunity qualification; pricing/commercial structure; joint account strategy; POC-to-contract progression.

Recommended CSM coverage: Fahdzli; Azrul; CSM commercial stakeholders; selected strategic customer engagements.

Amelia Nadia / Rashid Bin Ramli / Said Farid Zainudin — Event Activation Support

Primary scope: Event logistics, stakeholder hospitality, scheduling, operational support and activation support. Exact responsibilities should be assigned in the event operating plan.

Recommended CSM coverage: Cross-functional support rather than fixed permanent CSM counterparts.

5. Four-Layer Coverage Architecture

Layer	Aras Coverage	CSM Coverage	Purpose
Executive	Kenny / Farul / DAF	Senior CSM management	Authority, organisational commitment, resource and escalation decisions
Programme & Relationship	DAF / Hadri	Fahdzli / Azrul / programme leadership	Continuity, programme mobilisation, role clarity, cross-workstream alignment
Technical & Product	Hadri / Fuad / Farul	Zaharudin / Hafiz / Iqbal / Amirul / Nazri	Product, architecture, telemetry, AI platform, demos, POC definition
Commercial & Activation	DAF / Azza / Zulfelka / Shuhada	Azrul / Siti Aishah / commercial & market team	Campaign, target accounts, meetings, MQLs, commercial progression

Governance principle: No priority CSM stakeholder should depend on a single Aras contact for all matters. The primary owner remains accountable, while secondary and specialist coverage keeps the relationship moving and provides subject-matter depth.

6. Communication Ownership Model

Communication Topic	Primary Aras Owner	Aras Cover	CSM Audience	Expected Output
Strategic direction / partnership positioning	DAF	Kenny / Farul	Fahdzli / Azrul / senior CSM management	Executive alignment; strategic decisions; launch positioning
Programme actions / readiness	Hadri	DAF / Shuhada	Azrul / programme coordinators / technical leads	Weekly actions; dependencies; meeting coordination; readiness status
Product / technical matters	Fuad	Hadri / Farul	Hafiz / Zaharudin / Iqbal / Amirul / Nazri	Architecture; product capability; integration; demos; POC scope
AI platform / infrastructure	Farul	Hadri / Fuad	Zaharudin / Nazri / senior technical stakeholders	Models; GPU; APIs; production architecture; AI platform
Market activation / communications	Azza	DAF / Shuhada	Siti Aishah / Azrul / market/commercial counterparts	Campaign; collateral; invitations; co-branding; lead capture
Commercial opportunity	Zulfelka / DAF	Kenny / Shuhada	Fahdzli / Azrul / commercial team	Qualification; pricing; ownership; commercial pathway
Event operations	Designated event owner	Amelia / Rashid / Said Farid / Hadri	Designated CSM event counterpart	Schedule; VIP handling; logistics; event-day coordination

7. Priority Stakeholder Coverage Examples

Mohammad Zaharudin Ahmad Darus

Path 1: Hadri — operational/programme

Path 2: Fuad — product technical

Path 3: Farul — AI platform/infrastructure

Path 4: DAF — strategic escalation

Why this matters: Provides a complete path from day-to-day coordination to product, platform and strategic decisions.

Azrul Nazim Abdul Aziz

Path 1: DAF — relationship

Path 2: Hadri — programme

Path 3: Shuhada — account/operational

Path 4: Kenny / Zulfelka — commercial escalation

Why this matters: Supports programme mobilisation, account activation, operational follow-up and commercial progression.

Mohammad Fahdzli bin Abdul Rauf

Path 1: DAF — primary relationship

Path 2: Kenny — executive/commercial

Path 3: Farul — technology

Path 4: Hadri — programme execution

Why this matters: Ensures senior CSM engagement is supported by executive, technical and programme depth.

8. CyberDSA Strategic Engagement Flow

For a priority customer meeting involving CSM, Aras should distribute work before, during and after the engagement so that no single stakeholder is forced to carry the complete lifecycle.

Stage	Owner	Work Activity
Before meeting	Shuhada	Account intelligence; attendee verification; meet context
Before meeting	Azza	Messaging; collateral; approved customer-facing
Before meeting	Hadri	Solution alignment; technical context; CSM coord
Before meeting	Fuad	Demo readiness; product technical preparation
During meeting	DAF	Strategic framing; customer/business problem; opportunity direction
During meeting	Relevant CSM representative	CSM context; credibility; technical/domain context appropriate
During meeting	Fuad / Hadri	Product demonstration; architecture; technical inputs
During meeting	Zulfelka	Commercial follow-through where appropriate and
After meeting	Shuhada	CRM capture; actions; meeting record; assignment
After meeting	Hadri / Fuad	Technical discovery; POC scoping; technical action
After meeting	DAF / Zulfelka	Opportunity progression; commercial next steps; relationship
After meeting	CSM counterpart	Joint follow-up or validation where relevant

9. CyberDSA Responsibilities by Aras Stakeholder

Aras Stakeholder	CyberDSA Responsibilities
DAF	Strategic CSM alignment; high-value account meetings; product/POC escalation; opportunity ownership
Hadri	Integrated action tracker; CSM coordination; technical readiness; technical follow-through
Fuad	Stable product demos; technical narrative; product Q&A; POC scoping; relationships with CSM

Aras Stakeholder	CyberDSA Responsibilities
Farul	AI platform/infrastructure narrative; strategic technical meetings; architecture/platform matters
Kenny	Executive sponsorship; resource commitment; operational/comm
Azza	Campaign execution; communication packs; invitations; on-site m and nurture
Shuhada	Stakeholder verification; meeting booking; target-account intelligence follow-up coordination
Zulfelka	Commercial qualification; offer/pricing path; opportunity progress conversion support
Event activation team	Booth/event logistics; stakeholder hospitality; schedule support; a

10. Stakeholder Coverage Governance

- Primary owners are accountable for relationship continuity and should know the status of all material actions for their assigned CSM stakeholder.
- Secondary owners should be copied or directly included in substantive workstreams, not merely kept as passive email recipients.
- Specialists should develop direct working familiarity with the relevant CSM counterparts before CyberDSA, particularly Fuad with technical stakeholders and Azza/Shuhada with market/account stakeholders.
- Executive coverage should be used selectively for decisions, organisational commitment, resource escalation and strategic customer engagement.
- Every priority CyberDSA meeting should have a named pre-meeting owner, meeting lead, technical owner, commercial owner and post-meeting action owner.
- Any single point of failure identified in the coverage map should be corrected before the final CyberDSA readiness review.

Activity	Responsible	Accountable	Consulted	Informed
Strategic CSM relationship	DAF	Kenny	Hadri / Farul / Zulfelka	Relevant Aras team
Programme coordination	Hadri	DAF	Shuhada / Fuad	Kenny / Azza
Product technical engagement	Fuad	Hadri	Farul / DAF	Azza / Shuhada
AI platform engagement	Farul	DAF	Hadri / Fuad	Kenny
Market activation	Azza	DAF	Shuhada / Hadri	Kenny / Zulfelka
Account operations	Shuhada	DAF	Azza / Hadri	Zulfelka
Commercial progression	Zulfelka / DAF	Kenny	Shuhada / Hadri / Fuad	Azza
Event operations	Designated event owner	Hadri	Amelia / Rashid / Said Farid / Azza	DAF / Kenny

11. Coverage Readiness Metrics

Readiness Measure	Target
Priority CSM stakeholders with named primary owner	100%
Priority CSM stakeholders with at least one secondary owner	100%
Priority technical stakeholders with direct Fuad/Hadri/Farul coverage	100%
Priority market/commercial stakeholders with direct Azza/Shuhada/Zulfelka coverage	100%
Strategic stakeholders with defined executive escalation path	100%
Priority CyberDSA meetings with named pre/during/post owners	100%
Priority stakeholders with current communication/action status captured in tracker	100%
Single-person dependency for critical CSM workstream	0

12. Immediate Action Plan

#	Action	Owner	Required Output
1	Confirm stakeholder list	DAF / Hadri	Validate CSM names, current roles and relevance; add any missing CSM stakeholders
2	Assign primary and secondary Aras owners	DAF	No priority CSM stakeholder remains without an Aras person.
3	Activate specialist relationships	Hadri / Fuad / Farul / Azza / Shuhada / Zulfelka	Begin direct working engagement with counterparts before CyberDSA.
4	Create stakeholder coverage tracker	Hadri / Shuhada	Capture CSM stakeholder, primary owner, last engagement, next action and escalation
5	Map CyberDSA account meetings	DAF / Shuhada	For each priority customer meeting, a list of participants plus technical/commercial topics
6	Confirm event activation owners	Hadri / Azza	Assign named owner for logistics, host management and on-site lead capture
7	Review coverage weekly	DAF / Hadri	Include relationship gaps and single point of contact in CyberDSA readiness review.
8	Complete final readiness gate	DAF / Kenny	Confirm all strategic, technical, commercial and operational coverage before the final launch rehearsal

13. Operating Position

The intended outcome is institutional coverage, not simply more people copied into communications.

Each Aras stakeholder must understand why they are covering a particular CSM counterpart, what subject matter they own, when they are expected to engage, and how their work connects to CyberDSA product launch and post-event conversion.

Recommended governance rule

Every priority CSM stakeholder should have: Primary Aras Owner + Secondary Owner + Specialist

Coverage + Communication Purpose + Required CyberDSA Activity.
